We work with our customers To build a better tomorrow.

As a company, Indocool has a clear vision: to become the leader in the composite manufacturing industry. From day one, our technical superiority has kept us at par with international standards.

Vision statement:

to provide the most innovative solutions, and move towards a sustainable future. We serve with sincerity and achieve excellence by providing value added solutions that help our customers to excel in their respective markets.

Mission statement:

to become “the company of choice” to clients who are looking for composite solutions.

Our sustainable model, strict quality standards, global export capacity and a keen eye towards room for improvement has helped us grow multifold, and enabled us to service our clients better.

A legacy of excellence, centered on our customers

Our customers have always been at the heart of our business model. This MO has earned us recognition as a leader in the composite industry. We have been supplying key composite components to major OEMs for over two decades. Their testimony speaks for our adherence to safety standards, production quality, on-time delivery, consistency and global export capability. We have the infrastructure, and are constantly upgrading our technology, safety and quality certifications to stay on par with international standards. This makes Indocool your perfect composite partner.

A commitment to the highest standards & best practices

We are one of the world's largest manufacturers of nacelle covers, rotor covers and generator casing for wind mill customers. A significant part of our success story is our adherence to the highest quality standards and safety practices.

- Rotor blade manufacturing capabilities
- Expertise in epoxy, vinyl ester & polyester resin systems
- Adaption of APQP4Wind and Lean4Wind
- In-house tooling facilities
- New product development team
- Strict adherence to statutory compliances

Infrastructure and capabilities on par with the best

Manufacturing Facilities to meet the production standards with some of the best machinery in the industry, and a dedicated lean team to implement and oversee production, your product is in safe hands, right from conception.

Our areas of expertise in manufacturing FRP Products are **Vacuum Infusion, LRTM, Hand Lay-up and Pultrusion process**. Our manufacturing process promises you optimum production aimed at zero defective PPM.

The industries we serve

Wind Energy

Indocool has more than two decades of industry experience in the manufacturing of FRP Composite products. We are one of the wind industry's most experienced and knowledgeable composites design and manufacturing partners.

Indocool provides high-quality FRP composites of Nacelle Cover, Rotor Cover, Generator Casing, and Pultruded Profiles. We are equipped in manufacturing Rotor Blade. Our comprehensive infrastructure is perfectly suited to cater to the growing demands of the wind energy sector.

Automotive

Indocool supports the commercial vehicle / Electric Vehicle segment by supplying interior and exterior composite parts.

Railways

Railway industry operates on higher levels of safety standards and durability needs. As industry leaders, we provide locomotives with composite solutions that are easily integrable with the vehicle, like the modular toilets we manufacture for the Integral Coach Factory in India.

Other Industries

As the demand for lighter, stronger materials increases in more and more industries, Indocool keeps venturing into these industries, delivering the best of the composite products. Here are a few industries that we operate in, and have the capacity to work in

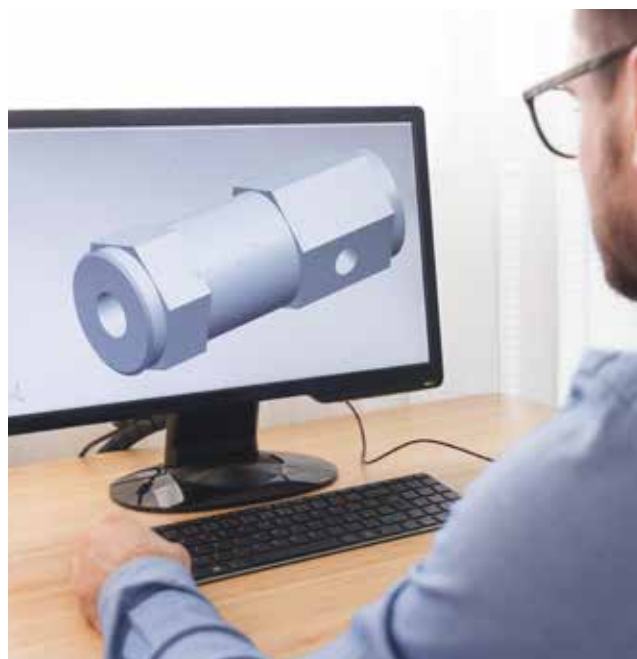

**Petro-Chemical | Farm Equipments |
General Engineering | Construction |
Chemical | Sports | Bio-Medical.**

We work with our customers to develop innovative, customized solutions adapted to their specific needs.

Design & Proto-type

Indocool provides customized tooling solutions for cost effective and high-quality plug and mould construction with jigs and fixtures fabrication. We work with our customers to develop creative, customized solutions adapted to their specific needs. Expert advice, customer-specific service and rapid technical support are the standards at Indocool.

Our New Product Development Team evaluates every design and executes it to perfection. We follow APQP4Wind and LEAN4Wind for new product development with respect to our clients in the wind energy sector. Each new product design is produced to perfection with a solid SOP.

Quality Assurance

As an ISO Certified company, Indocool is equipped with an in-house laboratory to conduct stringent quality checks on all its products.

We are focussed on delivering high quality products every time, and continually strive to improve the effectiveness of our Quality Management System, in our quest to achieve zero PPM.

- Focus on customer satisfaction/delight
- Dedicated Key Account manager to handle customers
- Periodic visits to customer for better interactions and collaboration
- New product development enhanced with APQP4Wind system
- Quality Improvements Projects using 8D/DMAIC

Supply Chain Management

As a composite manufacturer, our relationship with our suppliers is best defined by our never-ending insistence on quality. Our suppliers for raw materials and bought parts have been selected after stringent assessments and alignment with our needs.

Indocool has always had a holistic approach towards the business. To that end, we ship our products around the globe. We offer national and international delivery options on JIT basis. Our experience in delivering to countries like Spain, USA, Denmark, Germany, Turkey, Brazil & China has helped us arrive at an optimal SOP.
